

# STEAM out Hunger: Can Structures

While each STEAM into Service unit has a different focus our goal is to continue the lessons from each unit into our everyday life at KJDS. As a carry-over from our first STEAM into Service Unit: [STEAM out Hunger](#) our students build a [structure each year](#) out of cans, and the cans are then donated to Second Harvest Food Bank. This year our students were invited to build alongside architects and builders at [Knoxville's Canstruction and built an 8ft. Menorah](#) out of cans.
